ANNOUNCEMENT

Welcome Message

Greetings, and *Selamat Datang* (welcome) to Sarawak, the Land of the Hornbills!

The indigenous communities of Sarawak consider it auspicious when a hornbill flies over their homes. Hornbills are rainforest birds, characterized by their unique large curved beaks. While certainly decorative, these beaks are extremely functional, and having evolved binocular vision, the hornbills are able to see and to handle their food with **precision**.

Precision is the hallmark of surgical practice. The right intervention, for the right reasons, for the right patient at the right time - delivered with skill and accuracy by the right practitioner - is a mantra for all healthcare practitioners. Surgeons, who have to navigate an increasingly challenging landscape, must balance arduous and long training for acquisition of complex technical skills with concurrent development of humanistic skills. The cost of cutting edge treatments must be weighed against the shrinking budgets of healthcare systems. We need to avoid driving patients into catastrophic health expenditure without any discernible improvements in quality of life. With a plethora of therapeutic options to choose from, a rapidly evolving evidence base, and changes in expectations from an increasingly diverse patient population, surgeons must have precision in every aspect of navigating the patient journey, not just in performing operations.

It is appropriate, therefore, that the theme of Coloproctology 2023, the 21st Annual Scientific Congress of the Malaysian Society of Colorectal Surgeons (MSCRS), is '**Beyond Precision**'.

The Organising Committee has crafted a scientific programme to pull together what it means to go beyond precision in the 21st century. While many of the symposia are disease-focused, the panels are diverse, in keeping with decision-making needs for individualized patient care. Technological developments in

Welcome Message

diagnostics and therapeutics are addressed, while also paying attention to the perspectives of stomates, cancer survivors and allied health professionals.

However, in addition to precision in clinical care, we must also apply the same rigour to training the next generation of surgeons, as well as to research, to further refine existing paradigms, or even create new ones. Thus, we have a dedicated track for core topics, highly suited to general surgical trainees and colorectal fellows, but also useful for experienced surgeons wishing to update their knowledge.

While the metaverse, and its related tools, has become the norm for interactions in the COVID-era, their place in the surgical world continues to evolve. The Presidential panel will discuss how this, and other factors, may impact screening of colorectal cancer, in what I am sure will be a lively debate!

Nevertheless, while virtual platforms have their uses, 2023 sees a welcome return to a fully in-person Coloproctology. The value of informal interactions afforded by face-to-face activities is priceless, allowing the establishment of long-lasting collaborations and friendships. I hope you will be able to take advantage of the social activities we have planned, including the Gala Dinner, aptly themed '**Contemporary Tradition**', where the fashion-forward among us will get the opportunity to show off our artistic flair. Should you have the time to extend your stay, there are plenty of attractions in Kuching and the surrounding area, from beaches to rainforests and everything in between.

See you soon!

BEST POSTER AWARD

The Best Poster is for the best original scientific or clinical paper submitted by young surgeons in Malaysia for presentation at the Coloproctology 2023. This award will hopefully encourage a high standard of research and scientific presentations among young surgeons.

THE PRIZE

There will be three (3) Best Poster Awards:

1st Prize - RM1,000

2nd Prize - RM750

3rd Prize - RM500

REGULATIONS

1. The competition is open to all young surgeons and surgical trainees currently working in Malaysian institutions who are below 35 years old as on 1st January 2023.
2. The work submitted may be from any surgical specialty, and it may take the form of clinical trials, surveys, retrospective studies, laboratory experiments or any other form of unpublished original work.
3. The bulk of the work which are submitted must be performed by the author himself/herself even though he/she may have done the work in conjunction with other doctors or agencies either locally or overseas. However, the work must be carried out in Malaysia.
4. The author must submit a signed declaration of his/her age, that his/her paper has not been published or presented elsewhere and the presenter has done most of the work.
5. The abstracts for poster presentation are to be submitted online at www.colorectalmy.org
6. The closing date for receipt of abstracts is 4th February 2023.

SUBMISSION OF ABSTRACTS

GENERAL GUIDELINES

1. No limit is imposed on the number of abstracts submitted by individuals.
2. Abstracts are to be submitted in English only.
3. Abstracts must be accompanied by payment of registration fees. If the abstract is subsequently not accept for presentation, and the author wishes to cancel his participation, the registration fee will be refunded to the author.
4. The final selection will be the responsibility of the Scientific Committee.

Call for Abstracts
